

# VISO-CLEAN

## Cleaning wipes for visors and helmets

### Description

VISO-CLEAN quickly and effectively loosens and removes dust, insects, oil residue etc. Increased safety thanks to a smudge-free, clear view. The handy little cleaning kit, which contains one wet wipe and one dry, fits in any small bag, making it perfect for use on the move.

### Product features

- perfect and effective clean
- see clearly again straight away
- can also be used to clean wind shields, lights and indicators, for example
- packaged individually

### Field of application

Helmet visors and shells, wind shields, lights and indicators

### Application

If there are any stubborn patches of dirt, place the wet cleaning wipe on the visor and leave it to work for a few minutes. Then scrub them away using the dry wipe.

### Notes

Do not use Viso-Clean on the inside of the visor! As various manufacturers use certain finishes on the inside of their helmets, we cannot rule out the possibility of a reaction on the visor and this reducing visibility. To prevent any safety hazards, we recommend cleaning the inside of the visor as per the manufacturer's instructions.
